

IOPD - GSD2 Pompe - Specialist Paediatric Centres

In **England**, people diagnosed with GSD2, or Pompe Disease are referred to one of the highly specialised treatment centres at three paediatric and five adult hospitals

In **Wales** patients are generally referred to either the Specialised service at Cardiff or the Manchester centres

In **Scotland**, a metabolic network exists between specialists in Glasgow and Edinburgh

Ireland has very few patients, who are referred to either Belfast or Dublin Hospitals

England: Highly Specialised Paediatric Centres
