

**MEDICAL ALERT CARD**

**POMPE  
DISEASE**

**GSD 2**

Pompe Disease (Glycogen Storage Disease type 2) is a life threatening condition that affects muscles, breathing and mobility.

I may have a weak diaphragm: respiratory failure is possible if I am laid flat. Get medical information before treating or sedating.

Ventilator Settings

Inspiratory pressure:                      cm H<sub>2</sub>O

Expiratory pressure:                      cm H<sub>2</sub>O

**DO NOT LIE ME FLAT**

**DO NOT GIVE ME OXYGEN**

- I may need non-invasive ventilation
- If supplementary oxygen is required; check my  $\text{Co}_2$  levels carefully
- Sit me up, and help me onto a chair
- Assist with my mobility
